SUMMARY

Data-driven professional with 12 years of experience in business reporting, operational metrics, and data analysis across technology and SaaS companies. Experienced in analysing business data, identifying trends, and translating findings into actionable insights through reports and visualisations. Currently completing a Data Analytics & AI program at WBS Coding School, with hands-on skills in SQL, Python, Tableau, data visualisation, and AI-assisted data workflows. Seeking Data Analyst opportunities in Germany, combining strong business understanding with growing technical analytics expertise.

TECHNICAL SKILLS

Programming & Data: SQL (MySQL), Python (Pandas, NumPy), data cleaning & transformation, data validation, data analysis

Data Visualization: Tableau, Looker Studio, Power BI (basic), Matplotlib, Seaborn, Excel

Methodology: KPI analysis, trend & pattern analysis, benchmarking, dashboard development

Data Workflows: Data quality, process automation, AI-assisted data workflows

Tools and Application: Jupyter Notebook, VS Code, Streamlit, MS Office (Advanced Excel, Word, PowerPoint)

Cloud: Microsoft Azure data services

CERTIFICATIONS

- Python Institute - PCEP (Python Entry-Level Programmer), Aug 2026
- Microsoft - Azure Data Fundamentals (DP-900), In progress
- Tableau - Tableau Desktop Specialist, In progress
- Microsoft - Discover Data Analysis with Power BI, Dec 2023
- Aon - Certified HR Analytics, 2021
- Excel Analytics, 2019

EDUCATION

Data Analytics and AI Course

WBS CODING SCHOOL, Berlin (May 2026 – Mar 2027)

Project-based, team-oriented full-time course using agile methodologies.

Hands-on training in SQL, Python, Tableau, and Looker Studio to process raw data, extract insights, and present visual data solutions through practical data analytics projects.

Eniac–Magist Partnership Analysis | MySQL, Python & Tableau

- Analyzed 25 months of transactional data across 9 technology categories to evaluate Eniac's potential partnership with Magist.
- Compared revenue, order value, pricing, product mix, and operational performance, with ~15% of Magist orders and ~14% of revenue coming from technology.
- Developed 3 Tableau dashboards to communicate market, pricing, and operational insights.

Eniac Discount Strategy Analysis | Python, Pandas & Jupyter

- Analyzed 226,904 e-commerce orders to investigate the relationship between discounting, revenue, and product performance.
- Built a data-quality pipeline addressing pricing errors, duplicates, missing values, and inconsistent product classifications, resulting in 40,985 analysis-ready orders.
- Analyzed discount depth, seasonality, revenue relationships, and product categories to derive data-driven business recommendations.

Master of Business Administration – HR & Systems

Avinashilingam University, India (2009 - 2011)

Bachelor of Engineering – Computer Science

Anna University, India (2005 - 2009)

PROFESSIONAL EXPERIENCE

Kovai.co — Manager, People and Culture (Sep 2022 – Jul 2024, India)

- Built HR dashboards and quarterly reports covering performance, rewards, and workforce trends across a 200+ employee SaaS organization and 5 business units.
- Analyzed compensation, performance, and workforce data to support benchmarking and job-level design, establishing a standardized framework used across performance cycles.
- Translated business requirements into structured workflows, reporting processes, and guidelines, supporting 2 annual audits and improving people operations.

Aspire Systems — Assistant Manager, HR (Oct 2019 – Mar 2022, India)

- Managed HR analytics and reporting for a 750+ employee business unit, maintaining workforce data and performance metrics for management reporting.
- Analyzed engagement, retention, recruitment, and performance data to identify workforce trends and support initiatives, contributing to attrition below 8%.
- Analyzed recruitment and performance data and supported the organization-wide implementation of continuous-feedback processes for 4,500+ employees using Synergita.

Radial Omnichannel Technologies — Senior Executive, Operations (Aug 2016 – Sep 2019, India)

- Managed HR operations and hiring for a 250-employee India Development Center, supporting workforce reporting and operational decision-making.
- Reduced monthly MIS preparation time from 2 days to 0.5 days by consolidating data from 3 HR systems — Workday, Jobscience, and GreythHR — using Excel-based reporting workflows.

Kiya.ai — Executive, HR (Apr 2012 – Aug 2016, India)

- Managed end-to-end recruitment for 2 major BFSI client accounts, delivering 55+ hires annually.
- Managed recruiting data and KPIs including time-to-fill, time-to-hire, and source effectiveness, using Excel to analyze data and prepare recurring MIS reports for stakeholders.

Relocation / Professional Development

- Relocated to Germany — Aug 2024
- VHS Duisburg — German Integration Course, B1 (DTZ Certificate) (Jan 2025 – Nov 2025)
- Amazon Deutschland — Sortation Associate, Temporary Position (Feb 2026 – May 2026)
